

REINVENTING OUTDOOR COFFEE BREWING

SINCE 2008

THE
BREW
COMPANY

BE YOUR OWN BARISTA, ANYTIME, ANYWHERE

We are probably one of the most innovative coffee companies, having succeeded in combining the specialty coffee experience with the convenience of being able to brew and enjoy it, wherever you go.

Our vision and mission are to enable outdoor lovers and travellers to experience a great specialty coffee – away from home, without compromising on quality or taste. And thus far, our product solutions have proven very popular amongst coffee lovers pursuing an active lifestyle, as seen in countless reviews:

THE COFFEEBREWER

The Coffeemaker is an innovative and worldwide patented outdoor coffee product. It is designed as a thin kraft paper pouch, with a very thin PE base, inner filter containing 20 – 22 grams of freshly ground specialty coffee, and a plastic spout which can be opened and closed with the twist of a cap.

The Coffeemaker enables you to brew specialty coffee and adjust the coffee intensity by simply adding hot water directly inside the bag. The end result? A premium quality specialty coffee brew, achieved with the ease and convenience of instant coffee, without the quality compromise.

AWARDS

AN OUTSTANDING OUTDOOR COFFEE EXPERIENCE

Our unique technology works like a hybrid of a pour-over coffee technique and a French press.

The result is a filter coffee brew, with the rich body and character of a classic French Press.

Unlike a French press, when our consumer has served the first cup (after which the brewing process stops), the Coffeebrewer will maintain the coffee nice and warm for around 30 min.

The level of quality and convenience inherent to our Coffeebrewer, in an away-from-home context, is what essentially makes our product solution the perfect choice for the outdoor lifestyle, in addition to its lightweight (weighing approximately 30g. in total) and compact, letter-thin design, which can easily fit into any bag, pocket or backpack.

We are:

CO2 Neutral –

In collaboration with We Forest and other partner brands, we are proudly contributing to offsetting 10 tonnes of carbon every month since June 2019, as well as planting trees in Tanzania.

Plastic Neutral –

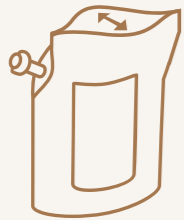

We are Certified Plastic Neutral by Plastic Bank®. In collaboration with Plastic Bank, we are offsetting the plastic used in our products by collecting the equivalent amount of ocean-bound plastic.

HOW TO USE

Click off the Coffeebrewer spout cap

Open the coffeebrewer

Pour hot water based and brew 4-8 min

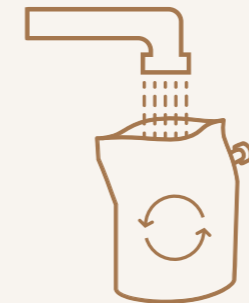

Serve un to 2 cups per Coffeebrewer

HOW TO REUSE

Empty the used coffee from the Coffeebrewer

Rinse gently with tap water

Refill with fresh ground coffee
