

vegan organics

Rømer has been selling vegan products since 1977 and has been a pioneer in the distribution of organic and vegetable products. Rømer Vegan products started its own production of Vegan products at the end of 2019. With production at Mols in Denmark, where we are housed in an old disused dairy, we now produce organic, vegan sausages, steaks, nuggets, fish sticks, Spreads, Pesto, Mayonnaise, BBQ sauces and much more.

The products are produced from mainly fresh organic vegetables such as: mushrooms, carrots, beets, onions, celery and Wakame seaweed. In addition, we use Danish-produced pea protein, as well as organic oils and spices. As an important part of our sustainability plan, we have decided to be a 100% soy-free factory, by transporting raw materials from far away is not in line with our ideology. By not using soy, we avoid felling rainforest - we like that.

All our packaging is produced from recycled material. A large part of our products is produced in glass, all of which are recycled. We have also chosen clean plastic products where it has been necessary to use plastic. We have chosen a completely new "single - plastic" type which means that the entire plastic part can be thrown away in plastic recycling. Labels are made of paper with environmentally friendly dot glue that makes labels easily fall off and thus can be thrown away in paper recycling.
